

Printers Compatible with Fired-On Images Transfer Paper

- ❖ **IMPORTANT!** *Only HP and Canon Black-Only (monochrome) Laser Printers can fuse images in a kiln.
- ❖ **ANY** model will work (even discontinued and older models) as long as it is HP or Canon laser machine and with absolutely **NO** ability to print in color.
- ❖ Use only authentic HP and Canon toner.

Currently available printers as of 05/17

❖ Older, used or discontinued HP or Canon black-only laser printers not listed here will also work with Fired-On Image Transfer paper.		

*** Micr toner cartridges will also work. Micr toner is the type used for printing checks and is very expensive. If you already own another brand of laser printer and do not want to purchase another printer... check online to see if there is a Micr cartridge available for your existing machine.**
